### HEALTHFUL FOOD.

excellent coat.

A large proportion of the baking powders in the market contain Ammonia, Alum, or Acid Phosphates, and as a matter of prudence housekeepers should insist upon knowing ALL the ingredients of their favorite brand. A knowledge of one of the ingredients is of little value, as it is no guarantee of the wholesomeness of the others; hence no reliance should be placed on any baking powder unless the manufacturers plainly state each and every ingredient used in its preparation.

If your patronage for a baking powder has been obtained by artfully written advertisements extensively circulated, note carefully whether or not its manufacturers impart to the public a knowledge of every ingredient that enters into their compound. Where this information is withheld would it not be wise to discontinue the use of that particular kind of baking powder and purchase instead one so pure and free from objectionable ingredients that there is in it nothing to conceal?

Cleveland's Superior Baking Powder is made only of strictly pure Grape Cream of Tartar, Bicarbonate of Soda, and a small portion of flour, and does not contain Ammonia, Alum, Lime, Acid Phosphates, or any adulteration whatever.
